

Custom Mini Rooms — Full Toolkit Documentation

This repo contains: generator, uploader, react mint dApp, and automation scripts.

Quick Start

1. Install Node.js and npm. 2. For uploader: npm install in repo root to get uploader deps (nft.storage). 3. In react-mint-dapp: npm install and run npm start for dev. 4. Place images in ./images and metadata in ./metadata before running uploader.
